EDUCATION

University of California, San Diego (UCSD)

Bachelor of Science in Data Science and Minor in Economics

September 2020- March 2024 | San Diego, CA

Cumulative GPA - 3.92 / 4.0

- **Provost Honors** | Equivalent of Dean's list at UCSD for academic years 2020-21, 2021-22, 2022-23, 2023-24.
- **Data Science Student Society** | Outreach Chair leading team of 4 – Spring '21, Fall '21, Winter '22, Spring'22.
- **Women in Computing** | Active member involved in club activities fostering women empowerment in technology.
- **Production Management Assistant** | Positively impacted the accuracy of data records and quality of data-driven decision making by organising, cleaning, and rectifying huge datasets for the UCSD production management team.

SKILLS

- Python | SQL | React | Java | R | Tableau | PowerBI | Stata | JavaScript | HTML | Excel
- Data Structures and Algorithms | Data Mining | Scalable Analytics | Machine Learning and Probabilistic Modeling | Econometric models | Time Series and Panel Data Analysis | Database Systems | Data Visualization
- Poetry | Skating | Classical Dance | Travelling | Gym | Cooking | Hiking | Mindfulness

PROFESSIONAL EXPERIENCE

Amgen

Associate Full Stack Software Engineer

October 2024 – Present | Thousand Oaks, CA

- Develop and enhance web features by integrating **React (frontend)** with **Python (backend)**, managing **DynamoDB data**, and optimizing **search functionality** for seamless user experience.
- Implement user management and data extraction, including **creating/deleting users, role-based access control, and SQL-based data retrieval**, ensuring efficient backend operations.

Topgolf Callaway Brands

Data Engineer Intern

June 2023 – September 2023 | Carlsbad, CA

- Engineered a **Python and SQL-based ELT pipeline** to migrate data from SAP to Snowflake, achieving a smooth data flow that reduced latency by 30% and enhanced the efficiency of subsequent analytics processes.
- Created a **PowerBI** dashboard to monitor data transfer health, facilitating immediate alerting of data discrepancies which improved stakeholder's decision-making and enabled the debug team to rectify data transfer errors by 25% faster.

Deloitte

Data Science Mentee

April 2023 – June 2023 | San Diego, CA

- Managed an agile team of 4 while collectively providing critical analytical expertise by dissecting complex healthcare datasets with **Python's Pandas**, uncovering trends in chronic diseases to steer strategic decisions.
- Designed intuitive dashboards to convey critical data insights, presenting to technical and non-technical employees.

Amul Kandyfloss

Data Analyst Marketing Intern

July 2022 – August 2022 | West Bengal, India

- Contributed to the creative development of 2 marketing strategies and revitalized social media content, employing **Python libraries (NumPy, Pandas, Matplotlib)** and **Tableau** for trend analysis, achieving a 15% sales surge via social media channels.
- Influenced reallocation of marketing budget using **predictive analytics** on **financial data** to achieve a 6% cost savings and 25% potential increase in audience reach while broadening ad distribution to Facebook, YouTube, and Instagram.

PROJECTS

MedDash – decoding health metrics to enhance patient care

October 2023 – March 2024

- Cross - collaborated with multiple departments and clinics to create a medical dashboard that improves patient care by integrating and visualizing (**React, JavaScript**) sensitive patient data from multiple sources.

Data Visualisation and Analysis using **JavaScript, HTML, CSS**

May 2023

- Conducted an analysis of a sales dataset, employed feature engineering to unveil key sales metrics which are helpful to make informed decisions, and enhanced data digestion through interactive visualizations on a custom-built website.

Power Outage Cause Predictor using **Python**

June 2022

- Processed and refined a dataset of 1500 + power outages, conducting **univariate-bivariate analyses and hypothesis tests**.
 - Trained a 90% accurate **Random Forest Classifier (sk-learn, grid search-cv)** to predict the causes of power outages.
-
